References for Transparent Data Sp. z o.o. Sp. k.

Headed by leaders of German credit bureaus Palturai GmbH (previously known as *Kantwert*) has started using Transparent Data API November 2016.

Our product, Palturai BusinessGraph, links publicly available economic data with the business partner information of customers and provides a unique view of business relationships. To develop our solution and take us one step closer to our vision of a transparent, worldwide network of relationships between companies and decision makers, we needed a trustworthy data provider from Poland, well-versed in new technologies.

The KRS API offered by Transparent Data was pretty attractive to us, as it gave our database the missing puzzle of companies and entrepreneurs from Poland.

Long-term cooperation with Transparent Data let us highly recommend them. They proved to be an effective team of RegTech experts.
